No. 30

## Key System Promises Better Transportation

### Changes in Personnel Company's Credit Stabilized

Oakland July 29.—Lester S. Ready resigned as president of the Key System Transit Co. at the regular meeting of the board of directors held in this city last Thursday, and A. J. Lundberg was elected president of the company effective at once.

Ready will remain with the directorate and will devote himself to the affairs of the company as vice chairman of the board.

A. J. Lundberg is a member of J. Barth & Co., San Francisco. This firm owns and represents the majority stockholders of the Key System and the change was made in order to give Barth & Co. more direct and closer supervision of the affairs of the company. Ready regard to Lundberg's appointment.

"Owing to the pressing financial problems facing the company and the heavy financial obligations resting upon the firm of J. Barth & Co. owning or representing the majority stock ownership of the company, it has been considered advisable that under the acute financial condition existing, a member of that firm should hold the position of president of the Key System Transit Co."

"I have therefore resigned as president and take the position of vice-chairman of the board of directors and A. J. Lundberg, member of the firm of J. Barth & Co., has been elected president."

Lundberg states that a change would be made in the financial structure of the company to restore the company's credit and to permit extensive betterments and improvements that will result in better transportation for the whole eastbay district. An automobile ferry from the present Key System pier is one of the projects planned and awaits only a change in the financial condition of the company for its fulfillment.

### Key Places Safety First Signs Over Crossings

Overhead wires are being placed for large illuminated crossing signs at 40th and West streets and 40th and Webster streets by the Key System Transit company. The signs are being made up in the local shops of the company and will be hung in place just as soon as completed. The Key System is placing this type of warning sign at many points on the system for protection of the motoring public as a result of safety first work among employees. It will cost the company nearly \$600 to install these two signs.

### New Building

According to building permits issued by Building Inspector A. J. Hurley, to M. B. Sweet, the latter will expend \$9000 in building an apartment on the south side of Barrett between 14th and 15th streets. There will be 8 apartments in the building.

### Off For Convention

Dr. John Beard, Merrill Wright and Frank McNamara, delegates of Henry A. McNamara Post, will leave the latter part of this week for Santa Barbara to attend the annual convention of the California Department of the American Legion.

When they get this telephone vision thing perfected maybe it won't always be so bad to get the wrong number.

### A. J. Lundberg, New Head of Reorganized Key System

### Shortridge to Speak

Martinez, July 29.—U. S. Senator Samuel M. Shortridge will speak tomorrow (Saturday) at the ceremonies to be sponsored by the postoffice celebration committee.

### Big Vote Assured

According to City Clerk A. C. Faris' report 8320 voters have registered in Richmond and are entitled to vote at the bond election August 23. There has been 74 new registrations recently and a number of transfers. The election will be held for the purpose of raising \$600,000 for harbor improvements and the deepening of the channel.

### Richmond's New Labor Temple

Richmond's new labor temple will be quite an addition to 5th street when the interior of the building is reconstructed. The carpenters are at work tearing out the partitions and Pythian Castle will soon lose its former identity and name.

The new name is "Brotherhood Hall." The opening night of the temple will be announced in a few days.

### New P. O. For Pittsburg

The Ariss-Knapp Excavating Co. arrived on the ground Tuesday with a steam shovel to begin excavating for the new postoffice building.—Pittsburg Post.

### Price Not For Consumers

Pittsburg, July 29.—Sacramento river fishermen have demanded from the S. F. wholesalers 16 1/2c for catfish and 10c for the fall run of salmon.

### Disturbed the Services, Didn't Know It Was Loaded

Curiosity continues to get folks into trouble. George Mallory of Buffalo amused himself in church by gouging his pocket knife into a small metallic object he had picked up. A loud report startled the congregation and George found a thumb and forefinger missing. He had been playing with a dynamite cap.

### Pt. Richmond Wins Cup

The Goodman Cup, offered by W. U. Goodman of Suisun, grand chancellor, to the outside lodge having greatest number of members present at the district convention, was won by the Point Richmond Lodge No. 241, when 22 of its members were in attendance at the convention of District 17, in Martinez. No 241 is the youngest lodge in the county.

Los Angeles is on file in all the public libraries in Contra Costa county.

## New York-Hollywood Attract Fearless Youths

Despite the lure of the moving pictures which for a time turned the tide of "stage struck" youths westward, New York is filled again this summer with aspirants to fame on the stage.

After investigating the stories told by the host of applicants to the theatrical men and women of the city, Women's Home Companion sums up the difficulties that they are bound to meet and concludes with the advice:

"The gamble as well as the theater has its charm. If the aspirants are venturesome, let them dive in. The water is fine and they will learn to swim or they will sink and be heard of no more along Broadway."

"Unmindful of handicaps, young amateurs still continue coming to New York," the article continues, "with but a few hundred dollars which they hope will last until they are thoroughly established. The beginner should be sure of three years' support while finding out her capacity to make good."

### Personal Mention

Mr. and Mrs. George N. Rooker returned Wednesday from Lake Tahoe.

Mr. and Mrs. J. C. Hitchcock have returned from a tour of the northwest, spending two weeks in that scenic country.

Secretary of Commerce Hoover, and Mrs. Hoover and son Alan, are spending a few days in the Yosemite.

George Fredenburg, city planner, is evolving a system of arterial highways to center in Richmond, and make 'em look at us, instead of short-cutting around us.

Mr. and Mrs. George R. Calvert returned from their annual outing in the Sierras over the Nevada line where the trout bite vigorously and the odor from gasoline is not so strong and the trails hard to follow.

Doc Fraser, in relating his experience with an erratic automobile while cranking it yesterday, said he was not positive, but is almost sure it was a Ford of pre-war vintage.

### Differences Adjusted

J. J. Kretzmer, secretary of the state federation of butchers, was a visitor at the butchers local union in Richmond Tuesday. He reported that all differences and disputes with the Skaggs chain had been adjusted throughout the entire state.

On account of the number of deaths having been caused by eating mussels, the state board of health has placed a quarantine on all mussels in the state of California and has forbidden their sale.

### Good Heavers

Twirler Farrell of Stockton and Twirler Noyce, two of the best pitchers in the central part of the state, have been signed up by the Y.M.I. baseball team to finish the season at Pittsburg.—Post.

### Again Postponed

A hearing before the railroad commission in the matter of the application for the establishment of stage service between Martinez and Byron has been postponed to an October date.

Motorcycle bill contests may not be held in El Cerrito this year on account of lack of financial support.

## BEWARE OF THE DEADLY DOTTED LINE

By W. R. MOREHOUSE  
Public Relations Commission, American Bankers Association

WITHDRAWING the family's savings account at the bank where it is safe, and losing it through speculation is a serious matter. It may bring great hardship, especially to the mistress of the home. It may force great economies in household management or amount to actual privation. It may mean that the children will have to go to work before they complete their education. The loss of the family's accumulations may even result in physical breakdown on the part of the wife through worry over the loss of savings which she helped to accumulate at the sacrifice of home comforts, but was not consulted when it came to investing them. The making of investments by men who are heads of families and inexperienced in finance should not be undertaken without consulting her. But even if both agree the venture should be talked over with the local banker or information about it obtained from the National Better Business Bureau in New York, which serves without cost and purely in the public interest. If this is done a lot of trouble and quite likely many regrets and heartaches will be avoided.

There is one point in the activities of the inexperienced investor where he should have above all a red-light stop signal to cause him to pause and investigate and that is just before he reaches the decision to "sign on the dotted line." Before you part with your savings in the bank by signing a contract placed before you by sharp promoters, stop, examine and investigate! It will pay to read the contract several times, even reading it aloud, all the while weighing every term. It will pay to be on guard against the deadly fine print usually incorporated in most contracts, so small that it strains your eyes and causes you to skim over it superficially. Do not sign blindfolded. It will pay well to take plenty of time to study the

contract by yourself where all is quiet and you are free from the personal influence of the persuasive promoter, for to sign without the calmest consideration may spell your Waterloo financially.

Unless dealing with a responsible firm or individual, never sign on the dotted line. In the least doubt, don't sign. Never sign on verbal assurances that you are fully protected. Terms stated orally but not incorporated in a contract are not binding. Glowing promises, wild exaggerations and gross misstatements of facts are seldom reduced to writing or made in the presence of your witnesses. Your failure to read and to understand a contract before signing is not a legal excuse. When you sign a contract you proclaim that you agree with its terms and will abide by and endeavor to carry them out.

Don't sign just because some high-pressure salesman tells you that you are a wonder, or that you show good judgment, or that you have a lot of sense. Sign only when you are fully convinced that your interests are fully protected.

Prominent Men Used as Scapegoat  
A number of slick promoters recently organized in a certain city an "automobile club" with the assurance

## Sullenger Lad Found He Came Near Private Funeral Held

Martinez, July 29.—After a week of search in the waters of Suisun Bay for the body of 10-year-old Verne Sullenger, the body was found three miles from the wharf at Payton where the boy fell into the water.

The little fellow was the son of County Auditor and Mrs. A. N. Sullenger, who have the sympathy of many friends throughout the county in their bereavement. The funeral services were conducted in private, Rev. W. H. Hannaford officiating.

### Fines Collected

According to official reports \$855 in fines was taken in by the police courts of Richmond during the last month.

## P.G. & E. Headquarters On 10th Street Closed

### Berkeley Boy Receives \$1000 Reward For Find

Chico, July 29.—Gerald Compton of Berkeley, 17, who found 19-year old Milton Hedlund, a Durham Colony youth who wandered away from his home near Chico, will receive the \$1000 reward offered by the parents of Young Hedlund for the return of their son. Compton found the Hedlund boy in a demented condition, clad in his night shirt and overalls, with one shoe and a gunnysack on his feet. He was found three miles from his home, his clothing torn, and unable to give an account of himself.

### Local Comment

Councilman Paulsen, chairman of the advertising committee of the chamber of commerce, is working on some publicity signs to boost Richmond and keep her on the main line of travel. The signs are to be installed along the highway through El Cerrito, San Pablo and thence north to the bridge. When the proposed plans of arterial highways are perfected, Richmond will be the center of traffic. As it is, cutting boulevard diverts travel to the south and on to the Marin county ferries, while the big state highway along San Pablo avenue skirts the hills in east Richmond and Mrs. Vista, following a direct route to Carquinez bridge, Richmond cannot wait until the city develops and builds up the highway, although that may not be long. She must bring the highways to her. With good business engineering this will no doubt be accomplished.

We all know that bond issues at the present time almost "write terror" to the taxpayer, who is becoming "hump-shouldered," and lets out an occasional groan. But what are we going to do? Let Ford flop off the hook? Not much. That isn't the Richmond way. The bonds will go over big. With Ford and his payroll, other industries will flock in. Richmond will become the Pacific Coast's greatest beehive. The bonds must carry; we cannot pass up the opportunity now at hand.

The market has advanced in the bootleg due, it is understood, to demands made upon the dispensers for an additional tax. The possession of a still under the new law is now considered a felony and is punishable by a term in San Quentin. Good bootleg that has been retailing at \$10 per gallon is beginning to soar, and like gasoline may work a hardship on some who have already reduced the meat, potato and bread budgets to their respective minimums. It is understood that \$25 per gallon may be asked by "manufacturers" now that the "requirements" have become more stringent.

Now that Almee and Ma are in a family row, there may be some beans spilled on the Carmel episode.

The Prince of Wales' picture is to go on the series of Newfoundland postage stamps. This ought to give the girls of the colony a real thrill every time they stamp a letter.

Born—To the wife of Waldemar Kruger, a daughter. She arrived Tuesday and weighed 8 lbs.

### Consolidated Office of Gas and Electric On 6th St.

As a result of the merging of the Pacific Gas and Electric Co. and the Western States Gas & Electric Co., the office of the P. G. & E. at 10th and Nevin will be eliminated and the consolidated office will be the Western States office in Sixth street opposite the Richmond Terminal newspaper office.

Both managers, Mr. Hitchcock and Mr. Rooker will be retained and have charge of their respective appointments. Mr. Rooker to be county manager for the P. G. & E. Co., and Mr. Hitchcock will be local manager of the consolidated office.

Both gentlemen, Hitchcock and Rooker, are well liked in Richmond and the patrons of the big utility companies are glad to learn that they are both to remain here and be identified with the city as heretofore.

### More Signs For Big Highway

San Pablo avenue is beginning to look like the Great Whiteaway at night with its profusion of electric signs.

The signs do not detract but add to the attractiveness of the highway and assist in illuminating the much traveled and congested artery to the bridge and ferries.

With added competition in ferries and bridges, announcements are being made of additional service. The latest is the S. P.'s application for a 5-year permit to maintain an electric sign at San Pablo and Macdonald avenues bearing the words:

"Turn Here—Auto Ferry to San Francisco."

With the various cut-offs in ferry service in crossing the bay to S. F., it may be that Oakland will eventually be "left out in the cold."

### Kern Highways Cost \$25,000 Per Mile

Bakersfield, July 29.—The total expenditure on highways in Kern county for the year 1925-1926 amounted to \$544,506.91. The total cost of maintenance and support of the county highways and bridges in Kern county for the year 1925-1926 was \$399,134.69. The total amount of the issue of the road improvement bonds was \$2,707,486.50. There was outstanding, June 30, 1926, \$2,075,486.50.

The survey states: "It is up to the taxpayers who must pay back this two and one-half millions of dollars to decide whether or not this money has been expended wisely for the 82.77 miles of highways; 10.68 miles of which was a rebuilding job on the highways built from the 1913 bond issue funds. The average cost per mile was approximately \$25,077.88, but the utility and life of the improvement should receive the first consideration by the taxpayers and county officials."

Andres C. Olson, Oakland real estate broker, and Miss Margaret C. Leonard, Oakland nurse, were united in marriage in Martinez by Justice of the Peace Frank Glass.

THE RICHMOND TERMINAL is the oldest newspaper in Richmond.

## CALIFORNIA NEWS BRIEFS

Due to recent deaths on the Pacific Coast from bites of the poisonous "black widow" spider, officials of Bakersfield are urging that all Kern County residents be on the watch for the insect, which is common throughout the West. Its bite has caused twelve deaths recently it is reported. The insect is small and shiny black, and it is found often in boards and in weeds or rubbish, it is said.

The state board of control met in Sacramento last week with a committee of county auditors in arranging preliminary steps for carrying out the new county budget act which is effective July 29 and which requires each county in California to set up an expenditure budget modeled somewhat on the pattern of the State budget.

Work will be started shortly at Bakersfield for the erection of an eight-story Class A hotel building for the Pacific Hotel Corporation. The structure will be erected at Eighteenth and H streets, Bakersfield. It will occupy at lot 107 by 115 feet. It will contain 916 rooms with 100 per cent baths, steam heating system, ventilating system and electric elevators. The ground floor will be devoted to stores. The structure will cost about \$600,000.

Federal and State loans to veterans have resulted in a rather heavy home building program in Visalia thus far in 1927. Twenty-eight new houses have been erected in the first six months of the year and building permits reached \$122,985 in that period, or \$40,000 above the same period a year ago. About half of the new dwellings are credited as due to the loans.

George Maglady, deputy fish and game warden of Modesto, assisted by Guy Tabler in charge of the fish hatcheries at Wawona, this week placed 60,000 steel head trout in the south fork of the Merced river near Wawona. They will plant another 100,000 in the same river at a later date they announced. Maglady and his assistants also have planted 50,000 in the south and middle forks of the Tuolumne river.

The display of many of the oldest makes of automobiles throughout California has been arranged for July 30 at Santa Cruz. Prizes are to be awarded for the oldest cars, which will be placed on display on the beach at Santa Cruz from the Pleasure Pier to the San Lorenzo river. There are many aged automobiles throughout California and owners are planning on shipping them by train and truck to compete in the old car contest.

Fire destroyed a historic covered wagon used in the early days of California by Carsten Grube in trading activities throughout the northern section of the state when more than 300 acres of grain on five ranches near Stockton were swept by flames last week. The wagon has appeared in parades here and was a feature of the '49 celebration in Sacramento.

The Southern Pacific Company filed a petition last week with the state railroad commission asking a rehearing of the order requiring cooperation with the Santa Fe and the Los Angeles and Salt Lake Railway companies in the construction of a \$10,000,000 union station. The railroad commission recently issued the order requiring construction on the new Los Angeles terminal to begin ninety days after the interstate commerce commission sanctioned the plans.

That old line of the effect that "everybody works but father" doesn't hold good when federal and state investigators turn the spotlight on this working world. Forty-one per cent of the population is at work, according to L. E. Ross, chief of the state bureau of vital statistics at Sacramento, and this group supports the other 59 per cent not recorded as gainfully employed. Among those not gainfully employed, wives, children and dependents lead, rather than lazy fathers.

Contracts for a laboratory building at the Marin Junior College at Kentfield, Marin County, to be constructed at a cost of \$27,000, have been awarded by the board of directors of the college. Work will begin immediately. The building will be of frame construction with stucco exterior, and with form one side of a quadrangle which will take form as other units of the college are built.

Numerous entries already have been received for the Northern California Horse Show, which is to be held on the Stanford University campus at Palo Alto August 8 to 13. The first large horse stable to be booked by Manager A. P. Fleming is that of K. H. Divan & Son, Monroe, Wis., which on July 23 will entrain fifteen Shetland ponies of the King Largo strain in which the Divan stock farm specializes.

Rev. John Matthews, Presbyterian pastor at Glendale, filed with the industrial accident commission in San Francisco the first request for state compensation ever filed in California by a clergyman. He alleges he strained a muscle during services, July 7th, and asked medical expenses and pay for lost time.

A frank report shows that weather history for Imperial Valley the afternoon last week when hail and two inches of rain fell within thirty minutes at Calexico. The temperature dropped suddenly from 106 degrees to 82.

The operations of the Pacific Stages will be extended over an all year route from Los Angeles to St. Louis, Mo., within sixty days. This is according to a statement made in Los Angeles by Charles F. Wren, president of the line, who added that the system will be pushed to the Atlantic seaboard as soon as a logical route can be determined and a few details considered.

Forty miles and no more will be the policy of the state division of motor vehicles when the new speed limit becomes effective on July 29th. This was announced by Frank G. Snook, chief of the division of motor vehicles. Under the present speed limit of 35 miles an hour, the traffic officers have been lenient with same, and careful drivers, allowing a margin of five miles' grace. But when the forty-mile limit becomes effective, forty miles an hour will be the top speed permitted.

The Western Pacific Railroad extension from Kingdom to Terminus where the road will tap the rich San Joaquin delta region, will be completed and ready for operation before the end of October, according to H. M. James, president of the Western Pacific Railroad Company, who visited in Stockton recently on an inspection tour. The extension will cost over \$500,000 and will include warehouses, packing sheds and water-to-car loading facilities.

Amador county ranked third in the production of gold for the year 1926 in California, according to statistics compiled by J. M. Hill of the United States Bureau of Mines. Yuba and Nevada counties led Amador county. Yuba county produced \$2,769,703 in gold from dredging operations. Nevada county produced \$2,318,846 and Amador county, \$2,167,275. The latter two counties have extensive lode mines. Amador county has fifteen lode and ten placer mines in operation.

National first honors as a city of beautiful home building has been awarded to Santa Barbara for the third successive year. News that this city had won the \$500 first prize offered this year for better home building by the Better Homes in America Association was received last week in a letter of congratulation to the Santa Barbara Better Homes Committee from Secretary of Commerce Herbert Hoover, founder and honorary head of the national better homes organization.

San Francisco to Los Angeles in three hours, for passengers and freight! This will be an actuality within 90 days, according to an announcement by Harris M. Hanshue, president and general manager of the Pacific Air Express, Inc. Flying equipment is now being obtained for the new line, Hanshue said. The planes will be multi-motored craft, having a cruising speed of 120 miles per hour with a load of two tons. Cabin accommodations for ten or more passengers will be provided.

Two more wells came roaring in for Julian stockholders at the Alamitos area of the Field Beach Oil field late last week, California-Eastern Oil Company officially reported. The first to come in was the Fleming well. It was reported a 700 barrel well. The second to come in was the Fueler well. This was the well that blew out two weeks ago and caused the fire. Engineers said the well was bringing in 2,250 barrels and getting stronger, every minute, with a 26.2 gravity and only 10 per cent mud and emulsion.

Bobbie Hardenbrook, 3 years old, broke through a board covering a well at Antler, near Redding and dropped 30 feet into water six feet deep. George Greenwood, sitting on the porch 20 feet away, saw the boy disappear. Running to the well he slid down the bucket line so speedily his hands were blistered. He found the boy sinking but grabbed him and then set him in the bucket. Members of the family above pulled the lad to the top. Bobbie was none the worse for the experience, save that his legs were skinned up a bit in the fall down the rock-walled well.

Wayward Wittenmeyer, 16-year-old slayer of Mrs. Fagnie Weigle of Pomona was convicted of second degree murder in Los Angeles by a jury which had been deliberating for three days. The jury of nine mothers and three fathers, brought in its verdict 14 minutes after it had reported to Judge Fletcher Bowron that it still was deadlocked. Sentence will be passed upon Wittenmeyer this week. The youth will be sentenced automatically to serve from 10 years to life in San Joaquin penitentiary as the jury failed to accompany its verdict with a recommendation for leniency.

Near-bow 'downing on the streets of Los Angeles was a wildly-welcomed sight when broken barrels bumped against the curb from a truck that was overturned in a collision with a trolley car. A score of thirsty citizens rushed to the rescue with dishpans and other utensils, hastily impressed into the duties of the old-time "soda-pail."

Traffic officers all over the state were instructed by Frank G. Snook, chief of the division of motor vehicles, to give particular attention to enforcement of laws prohibiting the throwing of lighted matches, cigarettes, cigars and other burning materials from moving automobiles.

## BIG WIND TUNNEL TO TEST AIR LAWS

New Aeronautical Laboratory to Help Designers.

Pasadena, Calif.—If it isn't handy to do scientific experiments on an airplane rushing through the air at 100 miles an hour, then rush the air 100 miles per hour past the stationary plane. Such in brief is one plan of the new aeronautical department of the California Institute of Technology. Thanks to the munificence of the Guggenheim foundation, its elaborate aeronautical laboratory, now rapidly approaching completion, promises to aid in bringing aeronautic design into the domain of exact science.

The new plant includes a large wind tunnel, wide enough to admit a small airplane. Powerful motor-driven blowers deliver a blast of air into one end of the tunnel and withdraw the same air from the opposite end. The blast thus makes a continuous circuit within the building like a well-regulated tornado. The airplane, however, as far as the experimenter is concerned, is traveling at high speed—admitting that motion is purely a relative matter.

In the wind tunnel a variety of problems on shape, size and thickness of planes, wings, rudders, etc., will be tested, both in the interest of stability as well as lifting power and speed. Preliminary calculations on the form and directions of curved lines and surfaces are running into the most abstruse mathematics, some of which lead to conclusions not readily tested in common flying practice. Whence comes the aid of the laboratory?

In the earlier days of aircraft it was thought that the frontal exposed parts of an airship should be sharp or slim tapered. A pointed prow, line plane-wire supports and extra thin planes were favored. Actual practice on the contrary has shown that a properly shaped strut of considerable width may actually offer less resistance to the air than a knife-edge or a wire. Apparently the old-fashioned hilly-owl is not so badly designed after all.

The new air laboratory of the institute will include equipment for motor research and general engineering design and will enjoy the co-operation of some of the best builders of mail and passenger planes now in service. Both American and German experts will direct research operations.

## Totem Pole Reported Floating Down River

Utah, B. C.—The report that a mysterious totem pole carved with a human figure is floating down the flooded Skeena river has been received by Harlan I. Smith, Canadian government archeologist here.

Mr. Smith, who is engaged in preserving ancient totem poles and making outdoor museums of them, has checked up on his collections and finds no exhibits in this region missing. A call was issued to the co-operation of some of the best builders of mail and passenger planes now in service. Both American and German experts will direct research operations.

Federal authorities now protect Indian monuments, Mr. Smith points out, so that it is unlawful to take such an object without permission or to mutilate or destroy it.

## Lone Red Hair on Coat Causes Divorce Action

New York.—Mrs. Ethel Quayle expects to win her divorce suit against Frank J. Quayle, hotel proprietor, by a hair—a red hair. Mrs. Quayle's hair is not red, so when she found a strand of that hue on her husband's coat lapel she hired detectives to shadow him.

According to the divorce papers she served on him, the detective failed to find a red hair on a young woman to a house in Brooklyn one evening last month. Came the dawn, and they snuggled Mrs. Quayle and three aunts of friends and relatives for witnesses.

The young woman with the hotel man, it is charged, had red hair.

## Flies' Wings Used to Get Heat of Stars

Washington.—Carrying an instrument so delicate that it is believed, it could measure the heat of a match 5,000 miles away if no atmosphere intervened, Dr. Charles G. Abbot, acting secretary of the Smithsonian Institution, has started for Mount Wilson, Calif., to continue the "heat-of-the-stars" experiment.

The instrument, so frail that flies' wings are used in its make-up, is described as an improved radiometer, ten times more sensitive than the one used by Doctor Abbot in 1923 when he made the first determinations of the heat spectrum of ten of the "brighter stars other than the sun in the history of astronomy."

The Smithsonian official also plans to visit the solar radiation observatory on Table mountain in California, where daily observations of the variations of the sun are being made in co-operation with stations in Chile and southwest Africa to determine the sun's influence upon weather conditions.

## GAME PRESERVE NEAR SUMMER WHITE HOUSE

Wind Cave National Park Interesting Place.

Washington.—President Coolidge's summer "White House," the game lodge of the Custer state park game preserve in the Black Hills of South Dakota, is only a few miles north of one of the federal big-game preserves. This is in the Wind Cave National park, 4,000 acres of which have been fenced and maintained by the biological survey of the United States Department of Agriculture. The preserve was established by act of congress in August, 1912, and its size will be nearly doubled this summer by including 3,000 more acres.

One of Largest Caves in West. Wind cave, for which both the national park and the game preserve have been named, is one of the larger of the known caves in the West, and, together with the bag-game animals in the preserve, which may frequently be seen by passing tourists, attracts increasing thousands of visitors each year. It is on the main highway from Custer to Hot Springs, S. D., on the southern slope of the Black Hills, commonly known as the foothills, a region made famous by Indian warfare.

The cave proper was named because of the current of air, often very strong, that blows intermittently in and out, varying in force and direction in response to changing temperature. It once served as channels for subterranean waters which now follow other courses. Approximately one hundred miles of passageways have been explored, and guides have penetrated to a depth of 1,500 feet. There are said to be thousands of passageways that have never been explored, and a party that leaves the beaten trails is in grave danger of being lost. For this reason no one is permitted to enter the cave without an experienced guide.

Discoverer in Doubt. Several men have claimed the distinction of discovering Wind cave. According to one story, a cowboy was riding along the ravine when a gust of air from a small opening in the ground blew off his hat and in this way attracted his attention to the cave. Old settlers differ as to who was the actual discoverer, and a great deal is left to conjecture. The cave has many interesting and unusual geological formations.

The game preserve contains 150 buffalo, 144 elk, and 18 antelope, and, as it is a bird refuge also, many species of wild birds are protected there, including grouse and quail. The situation of the Wind cave game preserve is ideal for the perpetuation of the big-game animals that in great numbers formerly roamed the Black Hills region. Near the game preserve and park is Buffalo gap, through which great plains herds of buffalo are said to have passed in massed formation on their way to and from their winter range.

## Changes Garlic Smell to That of Tea Rose

New York.—Changing the odor of substances that ordinarily smell like rotten eggs and garlic to the fragrance of the geranium and the tea rose is part of the work of Dr. Marston Taylor Bogert, professor of organic chemistry in Columbia university.

Professor Bogert is director of the research department established in the university more than a year ago by the American Manufacturers of Toilet Articles, the organization representing the perfume and cosmetic industry, for the purpose of making a study of the relation between odor and chemical constitution. Since the founding of this department, gratifying and startling results have been obtained.

The new sulphur and selenium compound is typical. Ordinarily unoxidized sulphur or selenium organic compounds have exceedingly disgusting and unpleasant odors. Sometimes the odor is so powerful that 1,400,000,000 of a milligram of the substance is sufficient to give a fairly perceptible smell. The odor of sulphur is like rotten eggs; that of selenium, like rotten eggs and garlic. Yet Professor Bogert and his associates have succeeded in synthesizing a "totally new compound, containing both unoxidized sulphur and unoxidized selenium, yet recalling in its fragrance the geranium and the tea rose."

## Good Hobo Can Make \$12 to \$15 Per Day

New Britain, Conn.—Any good hobo with a hard luck story can make from \$12 to \$15 a day, in the opinion of Prof. W. B. Bailey, formerly of Yale, who lived the life of a tramp three summers and then for ten years conducted a hobo's lodging house. "Thanks to the American housewife, the easiest thing a tramp does is to eat," he said in telling of his experiences at a Rotary club dinner. "The only objection he has to the American housewife is that she insists on feeding him cake and pie when what he wants is a slice of meat between two pieces of bread."

## It's Camel's Laugh

Sydney, N. S. W.—The good old ship of the desert should have a laugh at these modern ships of the air. A plane has just flown around Australia, but gasoline for it was sent to remote places by camel.

## WILD LIFE GALORE AT YELLOWSTONE

Animals Reported More in Evidence Than Ever.

Yellowstone Park, Wyo.—The wild animals of Yellowstone National park are making themselves more conspicuous this season than ever before. Although the bear is looked upon as one of the great attractions of the Yellowstone and may always be seen along the roads or at the special feeding grounds, the shyer animals that usually seek the higher ranges in the summer season seem to be staying closer to the main highways of the park.

Many park visitors report seeing moose elk and their calves and a number of baby deer. Moose are also reported plentiful, scarcely a day passing without some tourist reporting that he has seen a splendid bull or a cow and her calf. Of course there are special sight-seeing trips, and on these one may seek out the wild life of the park, gaining perhaps the best results from a hike or a horseback trip conducted to Specimen ridge from Camp Roosevelt, in the northeast section of the park. In this region wild animals may almost always be found. Parties taking these trips recently have reported seeing antelope, elk and mountain sheep. Perhaps the reason for the superabundance of wild animals in this section lies in the fact that Camp Roosevelt is not on the regular stopping schedule for the yellow buses of the transportation line and the tourist is apt to pass it by. In this rather quiet spot, however, those who are out for a real rest and vacation trip stop for several days to fish the rivers and explore the mountains and forest trails near the camp.

## 310,960,019 Coins Were Made in 1927

Washington.—Fifty-eight million nickels, 175,847,000 pennies and 49,000,000 dimes were turned into the pockets of the nation by the United States mints during the fiscal year ending June 30, according to a report just issued by the director of the mint. The coinage of money by the mints in Philadelphia, Denver, San Francisco and Washington fluctuated considerably during the last year, but this is due to varying demands for new money by the banks of the country, it was said.

The total domestic coinage for 1927 numbered 310,960,019 coins, with a value of \$102,653,123. Compared to the report of 1926, there is a decrease in the number of pieces produced, but an increase in the value of the coins. The most valuable coins produced were the double eagle gold pieces, with a total value of \$32,840,000. Proving wide prosperity in the nation is the fact that more gold coins were made by the mints in 1927 than in the previous year, with a value of nearly \$10,000,000 more.

In silver coinage, the total produced for 1927 was 27,523,019 pieces valued at \$14,029,559. Last year's figures show 65,012,456 pieces with a value of \$10,183,178. In this case it is shown that there were more pieces made this year, but with less value than the production of 1926.

## American Planes Flew 48 Million Miles in 1926

Washington.—A total of 23,310,355 miles was flown by civil and commercial aircraft in the United States in 1926, according to William P. MacCracken, Jr., federal chief of civil aeronautics. In addition to the mileage of heavier-than-air craft, it is estimated a total of 37,500 miles were flown by lighter-than-air craft.

The report included 1,536 planes engaged in air transport, sightseeing, exhibition, advertising, photography, crop dusting and other branches of aerial work. They flew an average speed of 90 miles an hour.

If the army, navy and coast guard flying time were to be added to this figure, the total American air mileage for heavier-than-air craft would be 48,586,462 miles, Mr. MacCracken said. Flying over 18 regular airways, 104 planes maintained a scheduled mileage of 4,474,772 miles in 1926. Reports from all operators indicate that 94,353 passengers were carried on planes free of charge. The number of paying passengers transported totaled 679,567. The number of hours flown was 234,313 and pay freight carried amounted to 418,086 pounds.

## Bobbed Hair Needs 10,000 More Barbers in England

London.—Shingling and bobbing have created jobs for 10,000 additional barbers in England in the last three or four years, according to statistics just compiled by the British Hairdressers' association.

There are now more than 42,000 barbers and hairdressers in England compared with 32,000 a few years ago. In 1914 one out of every five barbers died of consumption. This death rate has been greatly decreased since the war, due to shorter hours that barbers are required to work, and to the healthier conditions prevailing in the barber shops.

## Object to Dancing

Tientsin, China.—Li Shih-hao, former minister of finance, has received letters from government officials protesting against dancing by young Chinese men and women in his restaurant.

## A New Way to Make Jellies

Without Staining Fingers—Without Long Hours of Boiling—Without Depending Upon Berries or Fruit Being in Season.

One of the most interesting and yet one of the simplest new products in the food field is called minute jelly. It is pure fruit or berry juice already boiled down and concentrated. To this concentrated juice, fruit pectin in the right amount has been added. The pectin is that part of fruit which makes jelly "jelly." It is as pure and wholesome as the fruit juice. To make the jelly take the little bottle of concentrated juice, pour in a sauce pan, add water and sugar according to directions on the bottle and boil a few minutes. Then pour into jelly glasses and when it has become cold you have the most delicious pure fruit jelly you ever tasted.

A few bottles kept on hand, selected according to your taste for jellies, and you can make up a few glasses just as you want it. One small bottle makes two glasses of jelly. If you wish to try two bottles send us twenty-five cents and we will give you your choice of—grape, mint, pineapple, orange, raspberry, strawberry or blackberry. Or four bottles—all different—for fifty cents. Address Department WU, General Packing Corp., Cranford, New Jersey.—Adv.

## Humor Found Even in Sombre English Jails

Rev. Bustace Jervis, at one time or another chaplain at some of the largest English jails, tells these two stories in his book, "Twenty-five Years in Six Prisons": There was a very refined but sad-looking doctor at one prison. A man who was under sentence of death complained of toothache. He asked the doctor if he would take the tooth out for him. The doctor looked at him sadly for a moment or two, and said: "Do you really think that it is worth while?"

A wife whose husband was "doing" three years wrote that she would have nothing to do with him when he came out. She said she had met a very nice gentleman, who had taken her and the three children to live with him. They had tea for dinner every night, he took them to the pictures, and had bought the children new clothes and boots. She had never been so happy and comfortable and cared for in her life. After bidding him farewell, she signed herself, "Your broken-hearted wife, Clara."

For economy's sake, why not buy a vermin-proof which expels worms or tapeworms from your child? Dr. Perry's "Dead Shot" does it. 275 Pearl St., N. Y. Adv.

## Races of the World

The United States Labor department recognizes the following races of the world, in reference to immigration: African (black), American, Armenian, Bohemian, Bulgarian, Chinese, Croatian, Cuban, Dalmatian, Dutch, East Indian, English, Finnish, Flemish, French, German, Hebrew, Herzegovinian, Irish, Italian (north), Italian (south), Japanese, Korean, Lithuanian, Magyar, Mexican, Montenegrin, Moravian, Pacific Islander, Polish, Portuguese, Rumanian, Russian, Ruthenian (Rusniak), Scandinavian (Norwegians, Swedes and Danes), Scotch, Serbian, Slovak, Slovenian, Spanish, Spanish-American, Syrian, Turkish, Welsh and West Indian.

## Heartless Judgment

Artist—I have no other interests. I am wedded to my art. Critic—Must have been a secret marriage.—Capper's Weekly. It is easier to listen to someone telling about a show if he is making fun of it.

But Flyosan will get him too!

## Here's the right insecticide for each insect:

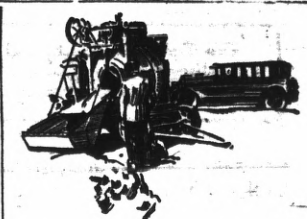

FLYOSAN, Liquid Spray—kills flies and mosquitoes. PETERMAN'S ANT FOOD—exterminates ants.

PETERMAN'S DISCOVERY, Liquid—exterminates bedbugs. PETERMAN'S ROACH FOOD—exterminates that cockroach army. PETERMAN'S MOTH FOOD—protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

## WOMEN OF MIDDLE AGE

### Praise Lydia E. Pinkham's Vegetable Compound

Mrs. Annie Kwinaki of 528 1st Avenue, Milwaukee, Wis., writes that she became so weak and run-down that she was not able to do her housework. She saw the name Lydia E. Pinkham's Vegetable Compound in the paper and said to her husband, "I will try that medicine and see if it will help me." She says she took six bottles and is feeling much better.

Mrs. Mattie Adams, who lives in Downing Street, Brewton, Ala., writes as follows: "A friend recommended Lydia E. Pinkham's Vegetable Compound and since taking it I feel like a different woman."

With her children grown up, the middle-aged woman finds time to do the things she never had time to do before—read the new books, see the new plays, enjoy her grand-children, take an active part in church and civic affairs. Far from being pushed aside by the younger set, she finds a full, rich life of her own. That is, if her health is good.

Thousands of women past fifty say they owe their vigor and health to Lydia E. Pinkham's Vegetable Compound, and are recommending it to their friends and neighbors.

Half the time, silence is the best answer.

He who tells what he would do if he were in your place seldom knows what to do on his own place.

## Aching, Swollen Feet

Money Back If Emerald Oil Doesn't Do Away With All Soreness, Swelling and Distress in 24 Hours. One Bottle Proves It.

No sensible person will continue to suffer from those intense agonizing throbbing foot pains when every well stocked drug store has Moore's Emerald Oil and sells it with an absolute guarantee of satisfaction or money back.

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture and pray for quick relief. What's to be done?

Two or three applications of Moore's Emerald Oil and in fifteen minutes the pain and swelling disappears. A few more applications at regular intervals and the swelling reduces.

And best of all any offensive odor is gone for good—it's a wonderful formula—this combination of essential oils with camphor and other antiseptics so marvelous that thousands of bottles are sold annually for reducing varicose or swollen veins.

**PARKER'S HAIR BALM** restores color and beauty to gray and faded hair. Keeps hair clean, cool, and soft. No itching. No dandruff. No loss of hair. Sold everywhere.

**HINDERCORNS** removes corns, calluses, and warts. No pain. No bleeding. No itching. No dandruff. No loss of hair. Sold everywhere.

**Kill All Flies!** THEY SPREAD DISEASE. Kill them with DART'S FLY KILLER. No odor. No taste. No harm to humans or animals. Sold everywhere.

**BOILS** There's quick, positive relief in **CARBOIL**. At all drug stores. Money-back guarantee.

**PLAY SAFE** on your vacation. Don't fail to take a jar of **ARSORBO**.

Nearly everywhere is using it for sunburn, chafes, rashes, cuts, and sores. There's nothing better for Sun Burn, Chafes, Rashes, Poison Oak, Scratches. A jar should be in every camper's kit. For Sale at all Drug Stores.

**FOR OVER 200 YEARS** haarm oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

**GOLD MEDAL HAARM OIL** corrects internal troubles, stimulates vital organs. Three sizes. All druggists. Insist on the original genuine Gold Medal.

**DON'T NEGLECT** inflamed eyelids or other eye irritations. You will find a soothing and safe remedy in MITCHELL'S EYE SALVE.

**HAIR & EYELID** at all druggists.

## Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

### FIRE IN THE WOODS

Sam and Peter were off on a trip of adventures. They were hoping to find buried treasure which they had heard had been hidden long years ago.

They had wandered quite a distance and had had some interesting adventures. They loved the rocky coast along which they traveled and the deep woods back from the coast.

They hoped to reach the harbor and the cove by nightfall. Then they could wander back to the river and sleep, overlooking the very ground where the treasure was to be found.

One of the things about which they were most particular was fire. Never did they leave a fire without thoroughly and even more than thoroughly putting it out.

They always used stones as a foundation for their fires so that it would be easy to put out and would be in no danger of spreading along the ground while it was burning.

But as they walked through the woods that afternoon they saw from time to time burnt ground and smelt the unmistakable smell of burning woods.

It was not very distinct but it was there just the same.

Every time they noticed it they stopped and stamped out the little fires that had started from so much dryness and from some spark carried from a carelessly left fire.

It delayed them, they knew. They were sure that at this rate they would never get to the treasure ground by night. But the woods were not to be neglected.

What if they let these fires go on untouched even if they were small! The woods might get really afire and how would they feel if they heard afterward of terrible forest fires that they knew they had been too selfish to stop and put out.

So they spent a good deal of time, stopping fairly often.

Fyward took they made quicker progress. There was no smell of burning woods now and they went along briskly.

"We can stop really early tonight and get to sleep so we won't sleep so long tomorrow as we did today. Then we can get up at daybreak and perhaps make our place during the morning," Peter suggested.

"We might have supper in about a half an hour and then stop for the night. What about that idea?" Sam asked.

"Good one," Peter agreed. So they walked along.

"It seems to me I smell that burning again," Sam said after a few minutes had passed.

"I think we imagine we smell it now after so many experiences this afternoon," Peter replied. "I don't really think I smell it. Well, there are lots of lakes in this section right along here so there wouldn't be so much danger in their getting any headway."

"Yes," agreed Sam, "but the lakes are surrounded by woods and the fires could just sweep around them."

"You're mighty cheerful!" "I do smell burning woods—more than at any time this afternoon."

"I'm sure I don't imagine it." "You're right, I smell 'em, too." And just then a shot of flame and a crackling sound could be heard.

"There's a bad fire here," Sam said. "And those little places this afternoon were started by sparks from it."

They went in the direction of the shot of flame. The woods around were crackling and now the smoke became dense and thick.

"Had we better run for assistance or see what we can do ourselves?" They stopped and Sam asked.

"The nearest place is the cove and that must be fifteen miles away," Peter answered. "We'd better see what we can do ourselves and get it underway. There are the lakes, but what in the world are we going to do about getting the water on the woods?"

It became quickly very dark. Surely it was not as late as the darkness would indicate. And then suddenly it became quite black. "There's going to be a shower to help us put it out," Sam said, brightly.

**Truthful** Once a little boy took a cigar. When he asked his father for a match, his father said: "You mustn't do that. Do you know where little boys go who smoke. Behind the woodshed," was the reply.

## MIDSUMMER STYLES LEAN TO NOBBY CHIFFONS AND GINGHAMS

TO BE ever so chic this summer, one must own at least one fluffy, printed chiffon frock, made with a view to emphasizing the soft silhouette. Fashionables everywhere are yielding to the magic of the teeny teeny figured chiffons. They are so truly feminine in their charm, and when they are founced and bloused and shirred like the one in the picture, with a touch of snowy georgette

FLOWER-COVERED CHIFFON

accenting the modish jabot treatment, they are simply enchanting. It is observed that the best people are wearing chiffons which are styled very simply. Every woman knows that it requires a superior technique and skill to fashion the simple appearing frock. That is why the model in the picture is so alluringly naive and eminently high class in appearance—it emanates from the salon of a leading member of the Art League of America. It needs no further credentials as to the aristocracy of its fabric and its fashion.

Notice how cleverly the deep-shirred ruffle which forms the skirt laps over the front to the extreme side, thus giving hint of a one-side overskirt drape. This is an idea worth remembering if you are thinking of making up some pretty soft fabric into a midsummer frock.

A vivid little flowers, say bright red or yellow on a black background, are the last word for printed crepes, chiffons and silks. Do not forget this fact, if you are choosing material for a new gown. These gay flowers stand out against their ebony background

Which all goes to show that to be absolutely chic, one's wardrobe must contain a goodly showing of smartly styled cotton frocks this season.

If every frock of cotton weave is as charming as the one in this picture, no wonder they are receiving such flattering endorsement by the mode. For this arresting model the compose theme has been developed by combining organdie with gingham.

The gingham used is one of the season's novelty checks with half-inch blocks in black and peach threads scattered on a very fine check ground in sea green and white. The skirt is box-plated. A modish sleeveless bolero over a blouse of peach organdie achieves chic in every detail.

Parchment kidskin shoes are worn with this costume, with champagne hose—which goes to show that fastidious accessories are as necessary to the fashionable cotton frock, as they are to the most formal silk or satin costume.

There's no end to the clever things being accomplished with the gingham and organdie in combination. A perfect gem of a sports frock consists of a

COMPOSE OF ORGANDIE AND GINGHAM

with startling color effect, and they make up wonderfully effective—quite the most swaggiest thing on the mode's newest summer dress fabric program.

Stunning ensembles of these tiny flowered silks feature sleeveless frocks with either a short jacket, a full-length coat of plain navy or black to match the background, these same being lined with the gay flower-covered silk of the dress.

To complete the picture, wear with this animated flowery ensemble, a hat of tremendous brim, simply banded with velvet ribbon.

JULIA BOTTOMLEY. (c) 1927, by Western Newspaper Union

## Current Wit and Humor

SHE TOLD HIM

Jay Barnes has been promoting boxing matches in Allentown, Pa. One day he went into a restaurant and ordered the native dish of spareribs and sauerkraut, but there had been a heavy run on the dish, so the waitress shrugged her shoulders and said "All."

"All what?" "All over," said the Dutch waitress. "All over what?" Jay wanted to know.

"All over with," was the final shot. —Los Angeles Times.

### COULDN'T HELP IT

Perch—That fellow has a nice sunny disposition. Rock—Sure. He's a sunfish!

### I Guess You're Right

It is better to give than receive. Of a whipping this doubtless is true. But of kissing I cannot believe. It holds good till I've tried it, can you?

### Bad Breaks

"How did the Smith wedding come off?" "Fine until the preacher asked the bride if she obey her husband."

"What happened then?" "She replied: 'Do you think I'm crazy?' and the groom, who was in a sort of daze, replied, 'I do.'"—Vancouver Province.

### The Only One

Wife—Do you think there is a man that could conscientiously say to his wife: "You are the only woman I ever loved?"

Hubby—Only one that I can think of.

Wife—Who? You, dearest? Hubby—Oh, no, Adam.

### Present Necessity

"After all, money amounts to very little."

"Yes, after all—in the meantime, however, it amounts to a great deal."

### Candor

Dauber—When I was 20 years of age I could have died for my art.

Friend (gazing around studio)—Ah, my dear fellow, if you only had.

### FULL OF WATER

"So Freddie's been dabbling in stocks, eh? With what result?" "Found he couldn't keep his head above water."

The anecdote was rather old. But still it sold. The Senator he hitched it to was new.

### Simplest Method

"Your constituents always seem to agree with you."

"I try to find out what their ideas are," answered Senator Sorghum, "and then agree with them."—Washington Star.

### Ouch!

"If I should die would you marry again?" asked Mrs. Grouch. "Huh?" growled her husband, "are you expecting me to go nutty from grief over losing you?"

### Educated

Jerry—Of all my friends I like the old ones best.

Ted—How come? Jerry—They're old enough to know better than to borrow money from me.

### Inconsiderate

First Lawyer—These people are kicking because we don't settle the estate.

Second Lawyer—As if we didn't need the money as much as they do.

If you are planning to trade-in your present car for a new car, remember these facts:

- 1 When you trade-in your used car for a new car, you are after all making a purchase, not a sale. You are simply applying your present car as a credit toward the purchase price of the new car.
- 2 Your used car has only one fundamental basis of value; i. e., what the dealer who accepts it in trade can get for it in the used car market.
- 3 Your used car has seemingly different values because competitive dealers are bidding to sell you a new car.
- 4 The largest allowance is not necessarily the best deal for you. Sometimes it is; sometimes it is not.
- 5 An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its real value.
- 6 First judge the merits of the new car in comparison with its price, including all delivery and finance charges. Then weigh any difference in allowance offered on your used car.
